Career Objective

Passionate Information Technology student seeking an Agentic AI Developer role to apply my skills in Artificial Intelligence and software development. Eager to learn emerging AI technologies, develop intelligent applications, and contribute to innovative real-world solutions.

Technical Skills

- **Programming Languages:** C, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks:** React.js
- **Tools:** Git, VS Code
- **Area of Interest:** Machine Learning, Database Management System

Projects

STEM Project (2024) – Ultrasonic Vision Glass

Developed an IoT-based Ultrasonic Vision Glass using Arduino UNO, Ultrasonic Sensor, DF Player Mini, and Speaker modules. Implemented real-time obstacle detection and distance monitoring using Embedded C in Arduino IDE. Integrated sensor interfacing and audio feedback modules to assist visually impaired users with safe navigation.

Mini Project I (2025)– Direct Market Access for Farmers

Developed a farmer-to-consumer marketplace application using ReactJS, NodeJS, and Supabase. Implemented modules such as authentication, product listing, smart price suggestion, order management, secure transaction handling, product search, and agricultural equipment renting to improve digital agricultural services.

Mini Project II (2026) – Stroke Detection from Brain CT/MRI Scans

Developed a deep learning-based medical image classification system using Python, TensorFlow, Keras, OpenCV, and Scikit-learn. Implemented preprocessing, data augmentation, transfer learning, and ensemble learning modules using VGG19 and EfficientNetB4 architectures. Integrated prediction, evaluation, and Gradio-based user interface modules for automated real-time stroke detection from CT/MRI images.

PlacePrep – Placement Preparation Portal-2026

Developed a full-stack web application using React.js, Node.js, Express.js, and MongoDB to support students in placement preparation. The platform provides aptitude practice, coding questions, study notes, and progress tracking in a centralized system. Implemented JWT-based authentication and role-based access control to ensure secure access for Admin and Student users. Designed responsive user interfaces and integrated RESTful APIs with MongoDB for efficient data management and seamless user experience.

Education

Dr. N. G. P. Institute of Technology, Coimbatore

B.Tech – Information Technology

CGPA: 7.28

K. G. Matric Higher Secondary School

Higher Secondary Certificate

Percentage: 68%

Certifications

- NPTEL – Human Computer Interaction (86%)
- NPTEL –Introduction to Industry 4.0 and Industrial Internet of Things (60%)
- Events -Completed Skill Development program on”Foundation of Cyber Security”

Achievements & Events

- Published and presented a conference paper titled ”Direct Market Access” at Rathinam College (2025).
- Presented a paper on ”App for Farmers” at Kongu Engineering College (Epoch’25).
- Participated in symposium at Madras Institute of Technology.
- Secured 2nd place in Code Rush at Sri Sakthi Engineering College.
- Secured 1st place in Battle of wits at Government College of Technology.

Languages

English — Tamil

Interests

Reading books — Exploring technologies — Continuous learning
